

DHANANJAY SITAP

DATA ENGINEER | AWS | PySpark | SQL | Databricks

ghananjay.sitap.data@gmail.com | Maharashtra, India | +91 9325538419 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Engineer with 1.6+ years of experience designing and implementing scalable ETL/ELT pipelines using Databricks, PySpark, SQL, and AWS. Experienced in building cloud-based Data Lake architectures, optimizing distributed data processing using Spark tuning and partitioning strategies, and delivering production-ready analytical datasets in the Retail and Banking domains. Skilled in pipeline orchestration with Apache Airflow and version control using Git and Azure DevOps.

PROFESSIONAL EXPERIENCE

Data Engineer

Jan 2025 – Present

2GBR Software Pvt. Ltd. | Client: Target Corporation

Technologies: Databricks, PySpark, Python, SQL, AWS S3, Redshift, Athena, Apache Airflow, Delta Lake, Azure DevOps, MySQL

Project Overview:

Target is a leading U.S. retail organization with 1,800+ stores and a strong omnichannel presence, including e-commerce platforms. The project focused on building scalable data pipelines to process large volumes of transactional and customer behavior data.

- Built ETL pipelines in Databricks using PySpark and SQL for retail data processing.
- Developed data ingestion and transformation workflows using PySpark following Medallion Architecture (Bronze - Silver - Gold).
- Stored raw and processed datasets in AWS S3 and queried data using Amazon Redshift and Amazon Athena.
- Performed data cleaning, joins, aggregations, window functions, and data validation using PySpark and SQL.
- Implemented data quality checks including null validation, duplicate detection, schema validation, and record-count reconciliation.
- Worked with Delta Lake to manage ACID-compliant datasets and incremental data processing.
- Created and maintained Apache Airflow DAGs with scheduling, task dependencies, retries, and monitoring.
- Collaborated with reporting and analytics teams to deliver business-ready datasets.
- Used Git, GitHub, and Azure DevOps for source code management and deployment support.

TECHNICAL SKILLS

Languages: Python (Pandas), SQL, PySpark, Spark SQL

Big Data & Processing: Databricks, Apache Spark, Delta Lake, ETL/ELT Pipelines, Distributed Processing

Cloud & Storage: AWS S3, Amazon Redshift, AWS Athena

Databases: MySQL, SQL Server

Orchestration & DevOps: Apache Airflow (Basic), Azure DevOps, Git, GitHub, CI/CD Concepts

Data Engineering Practices: Medallion Architecture, Data Quality & Monitoring, Agile Scrum

EDUCATION

Bachelor of Computer Applications (BCA)

2025

SRTM University, Nanded, Maharashtra

CERTIFICATIONS

NPTEL – Python for Data Science

Jan–Feb 2025

IIT Madras — Silver Medalist
